Tr sors de Jouy Collection

TR SORS DE JOUY highlights the beauty and artistry of Toiles de Jouy prints while featuring a broad assortment of the charming rustic weaves characteristic of Provenal French style. These graceful prints, born in the 18th century and originally created with finely engraved copper plates, most often depict romanticized scenes of country life. Though they were first produced in Ireland, England and Switzerland before being taken up by the French, it was Christophe-Philippe Oberkampf's manufactory at Jouy-en-Josas, a little hamlet near Versailles, which would ultimately produce the finest toiles and give its name to the category. As it kindles enduring passions for Country French d cor, the resulting collection, TR SORS DE JOUY, celebrates these historic works of art along with the legendary mill that made them famous.
